

*You're in the business of doing business.
Let us manage your Clōud!*

If you're looking for a smaller-scale function, like hosting your small business or organization's Exchange email system, our Value Hosted Server package provides you that service including 24/7/365 monitored support, response and resolution from our Clōud experts — at pricing starting at only \$250 per month.

If your data hosting needs are more significant, our Premium Hosted Server package steps you up to managed support. This opens your business or organization's Clōud Virtual Server up to receive incident management, security patching and anti-virus protection, and operating system installation, updates and patches — all at affordable pricing scaled to meet your exact configuration.

Managed support through Clōud eliminates the need to constantly secure and administer your servers, freeing you to focus on other vital elements of your business or organization.
